## About Maja:

Maja Bartoszewicz-Moritz is a rare disease advocate with over 15 years of experience across healthcare, advocacy, and patient representation. As FH Europe's Rare Diseases Project Manager, and a mother to a daughter with an ultra-rare condition, she combines professional expertise with personal passion. Speaking in four languages and skilled in cross-sector collaboration, Maja connects patients, caregivers, healthcare professionals, and industry leaders to drive meaningful change. Her strong understanding of healthcare, commercial, and insurance systems ensures she recognizes creative outreach that truly resonates and makes an impact. She believes: *"Alone, I can make an impact. Together, we can change tomorrow."*

Drawing on the challenges she has faced, Maja brings a deep understanding of the societal and emotional impacts of living with rare condition, ensuring that the most creative, authentic, and impactful outreach efforts are recognized and supported.
